

Responding to COVID-19: Remote Learning Data Support Services

Need help tracking and analyzing data under remote learning? We can help.

- 1) ****NEW** - End of Year Benchmark Assessment**
- 2) ****NEW** - Grading Equity Analysis**
- 3) Track and Analyze Attendance
- 4) Understand Academic Performance Trends
- 5) Automate and Personalize Family Outreach
- 6) Analyze COVID-19 Progress to Graduation (HS only)
- 7) Customized solutions

1) ****NEW**** - End of Year Benchmark Assessment

Remote learning has created challenges for schools trying to track student progress, see where students are falling behind, and plan for 2020-2021. It has amplified existing inequities as some students have greater access than others to technology, connectivity, and family resources to access learning. We can help you build and administer a short end of year benchmark assessment to help you plan for 2020-2021.

With our support, teachers or administrators create a common short assessment using Google Forms inside a Google Classroom assignment. Items can be selected from any source, or we can provide a standardized mini-assessment based on previous state exams that focuses on standards of greatest concern.

8.F.B.4

3

At a factory, the cost of making different numbers of toothbrushes is shown in the table below.

COST OF TOOTHBRUSHES

Number of Toothbrushes	3	6	9	12
Cost (dollars)	\$4.50	\$9.00	\$13.50	\$18.00

A linear function models the cost based on the number of toothbrushes made. Which statement about the rate of change of this function is true?

- A The cost increases by \$1.50 for each additional toothbrush made.
- B The cost increases by \$4.50 for each additional toothbrush made.
- C The cost increases by \$9.00 for each additional 3 toothbrushes made.
- D The cost increases by \$18.00 for each additional 3 toothbrushes made.

- ☐ A
- ☐ B
- ☐ C
- ☐ D

Our tool analyzes the results of each assessment to identify which questions and standards students struggled on most. Where items are pulled from past state exams, we can also compare students' results against citywide averages for those items when the exams were administered. Easy-to-ready results are provided by grade, class, subgroup, and individual student.

Results are filterable and sortable by grade, class, subgroup, and individual student

Name	Class	Question Type			Standard					
		Overall	MC	CR	8.EE.A.1	8.EE.A.3	8.EE.C.8b	8.FA.2	8.FA.3	8.FB.4

2) ****NEW**** - Grading Equity Analysis

How do you know if your school is grading students fairly and equitably? To inform this question, we can provide an analysis that shows how students have been graded compared to what we would expect based on the previous year's state exam scores. For example, how do the grades of students with IEPs compare to the grades of non-IEP students with the exact same state exam scores? Why? While the answers may be complex, this data can help inform critical conversations among teachers and leadership about grading and equity.

Estimated differences in course grades attributable to disability status, language learner status, and gender

Left chart shows average difference in marking period 2 grades between SpEd and GenEd students *who are matched* on 2019 test score, 2019-20 grade level, 2019-20 attendance (through March 2020), ELL status, and gender. Middle and right charts are analogous.

Charts show the estimated differences due *solely* to disability status, language status, or gender, which means that these estimates are additive. In other words, we estimate that a boy who is both SWD and ELL was graded, on average, 8.1 points lower in science than a typical girl who is neither SWD nor ELL (but has the same 2019 test score, has the same 2019-20 attendance, and is in the same grade

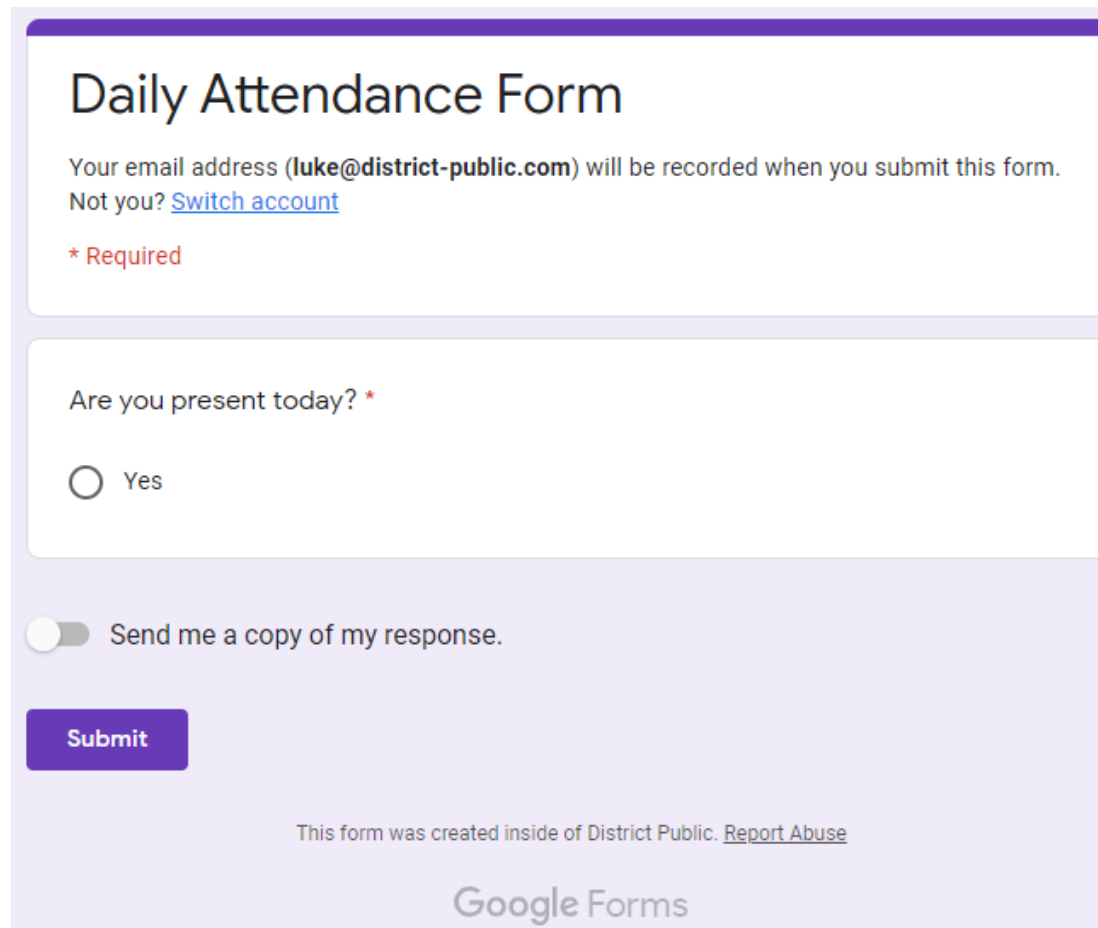

Grey bars represent estimates that are very uncertain. This means there's a good chance that there's no real difference in average grades for this subject between the two groups being compared. No meaningful differences were observed in any subject attributable to students' free lunch eligibility or housing status.

Students were matched on 2019 ELA exam scores for comparisons of English, Social Studies, Science and Elective grades. Scores from the 2019 math exam were used for comparisons of math grades.

3) Remote Learning Attendance Tracking and Analysis

We can build or customize a simple, easy-to-use system for tracking and analyzing students' attendance in the COVID-19 remote learning environment. We can help you launch a new system, or improve your current systems to more easily track, analyze, and prepare attendance data for upload the data to STARS in the DOE Daily Interaction spreadsheet.

Students fill out a simple, one-question Google Form.

The image shows a Google Form titled "Daily Attendance Form". At the top, it states: "Your email address (luke@district-public.com) will be recorded when you submit this form. Not you? [Switch account](#)". Below this, there is a red asterisk and the word "Required". The main question is "Are you present today? *". There is a radio button next to the word "Yes". Below the question, there is a toggle switch that is currently turned off, with the text "Send me a copy of my response." next to it. At the bottom left, there is a purple "Submit" button. At the bottom center, it says "This form was created inside of District Public. [Report Abuse](#)". At the very bottom, the "Google Forms" logo is visible.

Daily Attendance Form

Your email address (luke@district-public.com) will be recorded when you submit this form.
Not you? [Switch account](#)

* Required

Are you present today? *

☐ Yes

☐ Send me a copy of my response.

Save time entering data into the DOE's Daily Interaction Tool. You can populate the tool with a simple copy and paste.

Step 2: Copy and paste as values from the tab "Copy&Paste to DOE Spreadsheet Tool" in the DP Remote Learning Attendance Tool, cells A1 to E2000, into cells A3 to E2000 of this spreadsheet tab. Be sure to paste as values (so the values in the cells, not the formulas, are copied over). Double check that the date in E3 of the DP Remote Learning Attendance tool is for the current date.

4) Understand Academic Performance Trends

We can build tools to help you see student trends across and within digital platforms. We can combine data from multiple sources according to your needs. For example:

- 1) See how students are doing across subject areas, or from one assessment to the next in Google Classroom,
- 2) Compare pre- and post-Covid iReady and Google Classroom results, or
- 3) Compare Google Classroom engagement with pre-Covid attendance data

Understand iReady progress from diagnostic to benchmark exam for subsets of students.

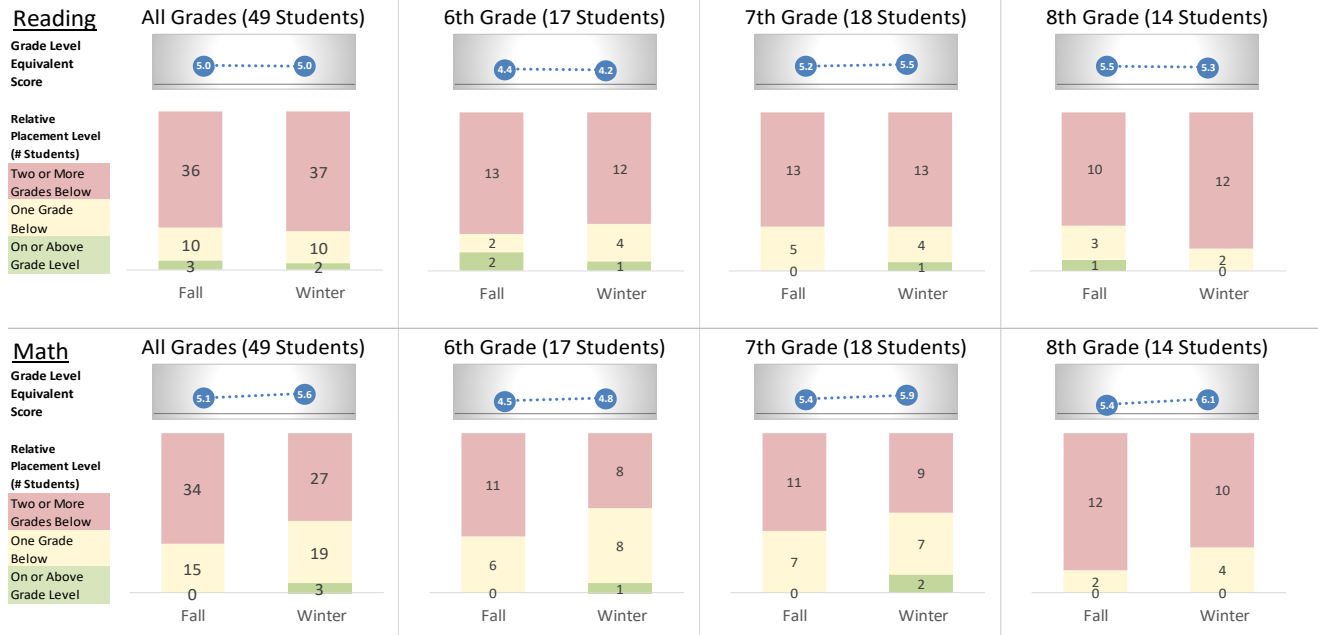

Level 1 Students (Math only) - Progress in iReady Scores, Fall to Winter 49 Students

The analysis below examines the progress achieved on the iReady Diagnostic Assessments administered in the Fall and Winter. There are two sets of charts for each subject and grade. The line chart at the top shows the average Grade Level Equivalent score, which is calculated using the iReady conversion table*. The stacked bar chart shows the number of students that scored in each relative placement category: Two or more grades below level, One grade below level, On or Above Grade Level.

ELA - The average grade equivalent score in Reading remained unchanged, from 5 in the Fall to 5 in the Winter. Fewer students scored on or above grade level, from 3 on the Fall assessment to 2 on the Winter assessment.

Math - The average grade equivalent score in Math improved, from 5.1 in the Fall to 5.6 in the Winter. More students scored on or above grade level, from 0 on the Fall assessment to 3 on the Winter assessment.

See progress by student by standard from one assessment to another, given in Google Classroom. Turn raw data like this...

5) Automate and Personalize Family Outreach

We can help you deliver automated, personalized outreach to keep students and families informed and engaged about student learning.

Deliver information by mail or email, with student attendance, remote learning progress, grades, or any other information - building on the systems you are already using

6) Analyze COVID-19 Progress to Graduation (HS only)

NYSED's guidance on the June 2020 Regents administration means that some students will be able to use exemptions from Regents exams to meet graduation requirements – do you know who they are? We can help you identify students who are already exempt from exams based on credits already earned, as well as students whose exemptions depend on passing current courses.
